

## DERMAQUEST Performance Ingredients

### Hyaluronic Acid (HA)

An essential hydrator for everyone's skin! Each molecule of hyaluronic acid can hold 1,000 times its molecular weight in moisture. It is known for its hydrating properties along with its natural delivery into the skin. Being one of the most valuable ingredients in skin care DermaQuest has incorporated this active into 90% of its product line to provide increased smoothness for plump, hydrated skin from the inside out.

### Skin Brighteners

The SkinBrite Collection is formulated with some of the most advanced skin brighteners to date! Each formula is uniquely created with many different tyrosinase inhibitors to stop the melanogenesis process in multiple steps giving you the most illuminating skin tone results. ChromaBright imparts the latest in skin brightening technology to effectively correct pigmentation and un-even skin tone. DermaQuest has incorporated this innovative ingredient into all the SkinBrite products. Hydroquinone stands as the most effective skin brightener that continues to be used in skincare and is used as an active in HydroBrite.

## Plant Stem Cells

Advancements with stem cell technology have continued to provide more powerful and effective marine derived and botanical plant stem cells in the skin care market. DermaQuest combines the latest generation of plant stem cells to reduce pigmentation, fine lines, and protect the skin from environmental damages. These plant stem cells contain all the active molecules of the plant to effectively address multiple areas of concern. Sea Fennel, Edelweiss, Gardenia, and Lilac plant stem cells are incorporated into some of the most advanced anti-aging products included in the Stem Cell 3D collection.

## Peptides

Made up of essential amino acids, these active ingredients are small yet powerful to drastically change the skin! Peptides are key anti-aging ingredients that reduce fine lines and wrinkles, promote collagen, reduce inflammation and brighten skin tone. With new peptides being discovered every year they are considered to be an active ingredient that will continually change and advance with time.

## Vitamin C

Is one of the most essential nutrients for the body and is a key component to maintaining healthy glowing skin. Vitamin C is an active ingredient that brightens and tightens the skin. Keeping up with cutting edge technology we have incorporated the

latest lipid soluble form of vitamin C, Tetrahexyldecyl Ascorbate, in our superior formulations. The most stable form of vitamin C with three times better penetration than L-Ascorbic acid! Tetrahexyldecyl Ascorbate can be found throughout the DermaQuest line and is most concentrated in C-Lipoic products.

## AHA/BHA

Alpha Hydroxy Acids and Beta Hydroxy Acids have been around for many years and continue their strong stride in being very effective performance ingredients to treat a wide array of concerns. These key hydroxy acids promote an increased cell turnover to reveal luminous new skin cells at the surface. While providing a quicker cell turnover rate AHA's/BHA's impart multi-functional qualities to improve skin texture, decrease pore size, reduce congestion, moisturize, and promote collagen.

## Minerals

DermaQuest brings you the highest grade micronized minerals in all of our sun protection products. Zinc and Titanium are utilized for their superior UV ray protection and pro-longed broad spectrum coverage. ZinClear SPF 30 offers you clear and tinted versions leaving the skin protected yet covered with a flawless finish. Minerals are safe, effective, reduce inflammation, and are designed to be used on all skin types especially sensitive and acneic!

## Antioxidants

Powerful antioxidants generate healthy cell renewal and acts as a cellular bodyguard for our skin. Essential for all skin types they protect our skin from free radical damage that our skin encounters on a daily basis. Co-Enzyme Q10, Idebenone, Alpha Lipoic Acid, and Green Tea Extract are widely used in DermaQuest products to give your skin an enhanced safeguard against environmental radicals.

## Enzymes

These gentle enzymes act as Pacman on the skin to digest the dead surface skin cells. Papaya-Pineapple and Pumpkin Enzymes provide gentle yet visible results to reveal a more youthful glow. When used in a daily regimen other active ingredients have the ability to penetrate into the skin to provide quicker skin care results.
